VISHWADEEP SINGH KUSHWAHA

SOFTWARE DEVELOPER

ABOUT ME

I believe that there is always a room for improvements regardless of one's level of expertise. These improvements can only be brought by trying new things and making mistakes while doing it. Learning from mistakes and having a positive attitude is the key to growth. I am also a technology believer and I believe that a better place for everyone can be achieved with advancements in tech.

EDUCATION

LOVELY PROFESSIONAL UNIVERSITY
2014- 2016 | Bachelor's In Technology(Dropped)

SDA HIGH SCHOOL
2012- 2014 | High School

EXPERIENCE

2022　　**SLEEKSKY - Software developer** (Aug 2022 - Present)
NestJS, React, Express, Azure, Keycloak

- I am responsible for building robust backend and frontend using react, node, nest.js and technologies around it.
- While at Sleeksky, I worked on a CMS, adding payment feature and a json visual form editor; and on a University-Hospital-Student placement management application.

2020　　**FLOCKALONG - Web developer** (Dec 2020 - Aug 2022)
Gatsby, Nodejs, Netlify Functions, C#, Auth0, Google Maps, Algolia, Cypress

- I was responsible for developing Gatsby based Front-End which served as a platform for customers to create, join and manage trips.
- Developed and deployed Back-End on Azure to facilitate the front-end.
- Implemented Algolia search engine and automated data updating to Algolia servers.

2019　　**KHAOBAO - Operations Manager** (Dec 2018 - Nov 2019)
Java, Android, Javascript

- I was responsible for development of Android Apps - Customer Side and Delivery Guy app.
- In parallel I was handling day to day operations including signing new restaurants, improving customer experience and launching new services.
- Completed 40k successful orders over a period of more than 14 months.

PROJECTS (FREELANCING)

2022   **TARGET DELIVERY**(Aug 2022)
         Logistics for MSMEs

- A bare minimum application for admin, driver and client to allow the company to take and manage order.
- Develop whole business model from defining core values to contemplating cost and distribution.

2019   **GBC** (June 2019 - July 2019)
         Linux and Windows Machine Scripting, Node

- I was responsible for adding local windows machine as an option to run shell scripts on an existing Node based interface(UI was based on Bootstrap).
- Was responsible for logging results from Linux and Windows Machines using socket.io
- Additional minor bugs fixing to run scripts on Linux machines.

2018   **FRIENDLY ROOTS** (December 2018 - January 2019)
         Javascript, Html, Node, CSS

- A Shopify commerce website to showcase all products.
- Major customization to existing theme because obviously, it was a theme.
- Integrate Affiliation part to the theme i.e.; Spin wheel, Lucky draw and Referral Affiliation.
